Office Action Summary	Application No. 09/942,003	Applicant(s) YAMAMOTO ET AL.	
	Examiner CRISTINA OWEN SHERR	Art Unit 3621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 December 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. This communication is in response to Applicant's amendment filed December 27, 2007. Claims 1, 7-11, 17-21, 24-28, 31-37, 39-42, 45-51, 53, 57-58, and 60-61 are currently pending in this case. Claims 25, 27-28, 31-36, 39, 41-42 and 45-50 are currently under examination.

Election/Restrictions

2. Applicant's election without traverse of claims 25, 27-28, 31-36, 39, 41-42 and 45-50 25, 27-28, 31-36, 39, 41-42 and 45-50 (group IV) in the reply filed on December 27, 2007 is acknowledged. Claims 1,7-11,17-21,24,26,37,40,51,53,58,60, and 61 are thus withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on December 27, 2007.

Response to Arguments

3. Applicant's arguments with respect to claims 25, 27-28, 31-36, 39, 41-42 and 45-50 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 25, 27-28, 31-36, 39, 41-42 and 45-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Black (US 6,307,956B1) in view of Yguerabide et al (US 6,586,193) further in view of either Schmidt et al (US 7,094,531) or Lockhart et al (US 6,344,316).

6. Black discloses an identity verification system, method, and apparatus that employ biometric technology for identity verification (e.g. col 4 ln 18-28). The biometric properties employed include, but are not limited to DNA (e.g. col 4 ln 30-40). Said system, method and apparatus make a "match" or "no match" decision and issues and certify or do not certify the user. (e.g. col 4 ln 55-65). Further, Black discloses recording and storing the layout information as either digital or magnetic information (e.g. col 4 ln 20-30). Further, Black discloses the use of cell capture/analysis sensors for use in identifying DNA (e.g. col 7 ln 50-60).

7. Although Black does not specifically reference recording the DNA layout information by arranging probe layouts in row and column directions, it would be obvious to one of ordinary skill in the art that array of immobilized single-stranded DNA (ssDNA) could be arrayed as rows and columns or any other logical manner (e.g. col 25 ln 25-35).

8. Further, Yguerabide does disclose reacting a DNA array in which a plurality of DNA probes corresponding to plural kinds of genes are arranged in a predetermined order, with a gene obtained from a given person (e.g. col 11 ln 30-50). Such an arrangement can obviously be used in conjunction or in combination with Black by one

of ordinary skill in the art in order to issue an authentication certificate using, *inter alia*, a hybridization pattern.

9. Neither Black nor Yguerabide disclose attaching the reacted DNA array to a base of the authentication certificate. However, both Schmidt (at, e.g. col 3 ln 21-31) and Lockhart (at, e.g., col 107 ln 4-12) provide such a disclosure. Such an arrangement can obviously be used in conjunction or in combination with Black and Yguerabide by one of ordinary skill in the art in order to issue a unique authentication certificate.

10. Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may be applied as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CRISTINA OWEN SHERR whose telephone number is (571)272-6711. The examiner can normally be reached on 8:30-5:00 Monday through Friday.

12. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew J. Fischer can be reached on (571)272-6779. The fax phone
